--	--

What is this event?

This is a competition, a gala, a conference, an exhibition of projects from talented younger members of the IET Toronto Network. Witness ten (10) of Canada's best up-and-coming engineer talents showcase their final year design projects. As always, IET events provide priceless networking opportunities. In addition we will be having events focused at our really younger members and their family to get them hyped and interested in Engineering and Technology

What is the Present Around the World competition?

This event is of global scale. Competitors from Europe, Africa, Australia, Asia, and North America participate in the world final. Competitors will present their technical project in front of audience and judges in 10 minutes or less, followed by a 5 minute questioning period. The main judging criteria are: Creativity, professionalism, speaking ability, and technical merit. We will have 1st & 2nd place winners

To become World Champion, competitors must win all three levels as shown below:

- Level 1 – Local Section Competition (@Ryerson, Guelph, Centennial, Sheridan, and McMaster)
- Level 2 – Toronto Regional Competition
- Level 3 – World Final in London, UK

Who are invited?

We strongly encourage our members their families and friends to show support for our up and coming Engineers. This event is open to all IET members, their families and friends and members of the public.

Please register with Mr. Gary Thompson at torontonetwork@theiet.org or call 416-725-3989 by June 30, 2009.

Agenda
